About

Senior Front-End Developer & UI/UX Engineer with 10+ years of experience building scalable, high-performance web applications.

SPECIALIZED IN:

- React & modern JavaScript front-end architectures (SPAs, dashboards, enterprise apps)
- Custom WordPress - Themes & Plugins & Headless CMS (Strapi)
- Laravel-based integrations
- UI/UX design and design systems

FOCUS AREAS:

- **Applied AI tools for personalized content delivery and predictive analytics.**
- Performance optimization and Core Web Vitals
- State management & server state (Redux, Zustand, React Query)
- Resilient API integration (retries, error boundaries, fallback UI)
- Clean, scalable UI architectures
- Accessibility (WCAG 2.1, keyboard, focus management, ARIA) and long-term maintainability

INDUSTRIES:

- Sports betting & gaming platforms
- SaaS products and marketing platforms
- Healthcare and banking applications
- Marketing platforms, A/B testing, and personalized email campaigns driven by AI to optimize user engagement across web and email.

AI-ASSISTED DEVELOPMENT:

AI-assisted development: I leveraged AI tools such as Cursor, Claude, and ChatGPT to accelerate debugging, refactoring, and delivery. However, I emphasized a disciplined approach by training junior developers in step-by-step prompt design, ensuring they understood best practices and avoided monolithic prompts. I also insisted that AI-assisted work always be paired with rigorous human code reviews, guaranteeing that every outcome was validated and held to high quality standards before delivery.
This approach not only improved delivery speed but also fostered a culture of accountability, ensuring that AI was a tool that enhanced, not replaced, critical human judgment.

TRAVEL AVAILABILITY:

- U.S. (tourist visa) · Canada (eTA)

Technical Skills

Frontend Development

- React, Next.js (SSR, SSG, ISR, App Router), Remix
- State management (Redux, Zustand, React Context)
- Modern JavaScript (ES6+, Async/Await, Closures, Event Loop)
- Advanced CSS (Flexbox, Grid, Animations, Custom Properties, Semantic HTML, BEM, design tokens)
- Performance (Code Splitting, Lazy Loading, Core Web Vitals, virtualization for large lists, memory leak prevention)
- Accessibility (WCAG 2.1, ADA, Section 508, keyboard navigation, focus management, ARIA)
- SEO & Web Best Practices

UI/UX Design

- Design systems & component libraries
- End-to-end application design & UX architecture
- User research (interviews, usability testing, heuristic evaluation)
- Design-to-code translation
- Tools: Figma, Adobe XD, Balsamiq, Sketch

Development Tools

- Testing (Jest, React Testing Library, Cypress, unit & integration tests)
- Data fetching (React Query, TanStack Query, SWR, resilient patterns)
- Git & GitHub (branching, workflows, CI/CD)
- Modern build tools (Vite, Webpack)
- Node.js-based tooling
- WordPress (custom themes & plugins)
- Laravel framework
- Headless CMS (Strapi)
- REST APIs & GraphQL (retries, error boundaries)
- Storybook (component docs, visual regression)
- SQL databases (MySQL)

Professional Skills

- Agile / Scrum environments
- Cross-team & async communication
- Troubleshooting & root-cause analysis
- Security & scalability awareness
- AI tools for productivity and development

Portfolio

BetAnySports

- ROLE: Senior Front-End Lead
- TECH: Strapi | React | Retina
- FOCUS: Headless CMS, data fetching, scalable SPA architecture, Core Web Vitals

Work Experience

Trigal Media

Senior Web Developer Lead — Set - 2025 - Current

- Led a cross-functional team of 10 developers and 3 designers in a specialized AI-focused company.
- Developed AI-powered applications for lawyers, healthcare professionals, and education sectors.
- Built e-commerce websites for micro and medium-sized businesses, enabling them to sell products via optimized shopping carts, payment methods, and automation tools.
- Specialized in AI-assisted development, using voice commands for prompts to guide developers, encouraging verbal input over typing and ensuring sequential prompts for precise outcomes.
- Delivered AI-driven tools with Laravel, WordPress, and Next.js, enabling rapid, scalable solutions.
- Spearheaded A/B testing strategies for e-commerce sites, leveraging AI to create and iterate page variants, resulting in faster go-to-market.
- Successfully reduced project timelines, completing applications that were originally estimated to take a year in just six months.
- Mentored developers in Laravel, ensuring best practices and efficient code delivery.
- Enabled small and medium enterprises to elevate their online presence, helping them position products effectively and grow their digital commerce.

Core stack: React, Astro, WordPress, TypeScript, Tailwind

Brand Builders Sportsbook

Senior Web Developer Lead — May 2024 - Aug 2025

- Led and managed a cross-functional team of 7 professionals, including front-end developers, designers, and marketing/content specialists within the online gambling industry
- **Incorporated AI-driven personalization to optimize user engagement across platforms.**
- Hired specifically to elevate the company's front-end and design practices, transitioning teams away from legacy workflows toward scalable, maintainable front-end architectures
- Played a key role in the development and evolution of the company's main brand platform (BetAnything.eu), supporting brand growth, performance, and content scalability
- Built and maintained high-traffic, marketing-driven platforms including affiliate websites, brand pages, and campaign landing pages
- Defined and implemented component-based front-end architectures to reduce maintenance effort and improve long-term productivity
- Oversaw delivery and maintenance of commercial websites, marketing platforms, and brand assets at scale
- Coordinated Agile/Scrum workflows across concurrent initiatives to improve delivery cadence and cross-team collaboration
- Provided hands-on technical leadership and mentorship, supporting developers through architectural decisions and modernization efforts
- Worked closely with stakeholders to align technical execution with marketing, product, and business goals
- Established testing practices (Jest, React Testing Library, Cypress) for component and E2E coverage, improving delivery confidence and reducing production bugs

Stack: React, Astro, WordPress, TypeScript, Tailwind

Prevent Security - BetUs Sportsbook

Senior Front End Developer · WordPress — Mar 2023 - May 2024

- Served as Senior Front-End Developer and technical lead, guiding a cross-functional team of 8+ developers and designers across high-traffic digital platforms.
- Led the development of custom WordPress themes from scratch for multiple high-profile sports media and editorial brands, supporting scalable content operations and long-term platform growth.
- Defined front-end architecture and component-based systems to improve scalability, maintainability, and speed of content production across concurrent initiatives.
- Delivered 10+ high-impact WordPress projects, coordinating timelines, priorities, and quality standards across multiple parallel workstreams.
- Trained and upskilled team members in building custom WordPress themes from scratch, strengthening the team's technical capabilities and delivery capacity.
- Aligned development execution with design goals by teaching UX/UI best practices, improving collaboration between design and engineering and increasing implementation feasibility.
- Acted as a bridge between design, content, and engineering teams, helping translate business and editorial requirements into production-ready solutions.
- Mentored junior and mid-level developers through code reviews, technical guidance, and best practice adoption, raising overall team maturity and implementation quality.
- Contributed to projects using Laravel for backend-driven functionality and React.js for interactive UI components, supporting more flexible and modern user experiences.
- Promoted agile workflows, continuous improvement, and shared ownership, resulting in stronger team alignment, better execution, and more reliable delivery.
- Helped generate continued business growth by delivering strong results, which led to a higher volume of projects and increasingly complex initiatives being assigned to the team.
- Successfully delivered modules that had previously been considered too complex to build, demonstrating strong technical leadership and the team's ability to execute challenging solutions under my guidance.

Core stack: WordPress, PHP, Laravel, JavaScript, React, Advanced CSS

Assemble Studio

Front End Developer - Freelance — Aug 2021 - Aug 2022

- Worked as a hands-on front-end and email developer delivering HTML email campaigns, banners, landing pages, and websites for pharmaceutical clients, adhering to strict brand, UX, and compliance requirements
- Collaborated closely with design teams to refine UX/UI practices and ensure consistency across regulated, content-heavy communications
- Contributed across the full project lifecycle, from requirements analysis and UX/UI design through final implementation
- Produced wireframes, prototypes, and design deliverables using tools such as Figma, Adobe XD, Sketch, and Balsamiq
- Developed reusable front-end components and templates to support scalable and maintainable delivery
- Created internal tooling using Node.js to improve development workflows, modularity, and team productivity
- Worked with dynamic content management solutions to support personalized, data-driven campaign execution at scale

Accenture

Web Developer Senior Analyst — Jul 2020 - Jul 2021

- Worked as a hands-on front-end and email developer within an enterprise marketing department, delivering high-volume digital communications during a fast-paced and highly demanding period.
- Built and maintained HTML email templates, landing pages, websites, and digital marketing assets for enterprise-level brand-driven campaigns, ensuring cross-client compatibility, performance, and visual consistency.
- Developed reusable email and front-end components using HTML, CSS, and JavaScript, improving consistency and scalability across campaign deliverables.
- Worked extensively with Salesforce Marketing Cloud at enterprise scale, including AMScript, Data Extensions, dynamic content, audience segmentation, personalization, and end-to-end campaign deployments.
- Created a Node.js-based email development bundle that introduced a component-driven workflow through a templating engine, accelerating development and helping standardize implementation practices across the team.
- Developed a QA tool that enabled simultaneous previews across multiple devices and resolutions with automatic refresh, significantly speeding up testing and iteration.
- Contributed to a 50% improvement in both development speed and quality by building internal tooling, streamlining workflows, and promoting more structured implementation practices.
- Produced component documentation in PDF format in collaboration with the design team, giving clients a clear visual reference of reusable modules that could later be customized by replacing text and images.
- Led training sessions on email development best practices for other teams outside my direct department, extending technical standards and improving cross-team capability.
- Trained junior developers in Salesforce Marketing Cloud and AMScript, helping them ramp up faster and execute campaigns more effectively.
- Collaborated closely with designers, marketers, and stakeholders throughout the full campaign lifecycle, helping translate business and brand requirements into reliable, production-ready assets.
- Delivered marketing assets for major enterprise clients, including Citi and Wells Fargo.

Business Solutions - JazzSports Sportsbook

Technical Lead Manager — Nov 2017 - Dec 2019

- Led and mentored two cross-functional teams of front-end developers, designers, and marketing/content specialists across casino and sportsbook initiatives, serving as the primary technical leader for multiple high-traffic digital platforms.
- Reduced production delivery time by 50% by introducing stronger development oversight, improving estimation accuracy, and establishing tighter execution standards across the teams.
- Served as the main point of reference for front-end and UI decisions, guiding architecture, implementation quality, and technical consistency across commercial websites, email platforms, animated banners, and marketing assets.
- Drove the modernization of front-end and design practices, helping teams move away from outdated workflows and legacy approaches toward more scalable, maintainable solutions.
- Defined technical direction and reviewed implementations to support scalable, component-based front-end architectures that improved long-term maintainability and team efficiency.
- Proposed and implemented the use of WordPress for SEO-driven commercial sites, aligning the technology stack with brand growth objectives and enabling stronger organic positioning through tools such as Yoast.
- Standardized processes, workflows, and best practices across teams, increasing consistency, improving quality, and creating a more reliable delivery model.
- Coordinated Agile/Scrum workflows across multiple disciplines and concurrent initiatives, improving collaboration, planning, and execution across teams.
- Mentored junior developers and helped grow them into mid-level contributors through hands-on coaching, code reviews, and technical guidance.
- Trained the UX/UI design team on modern digital best practices, including UX principles and HTML fundamentals, which improved cross-functional collaboration and raised the quality of final deliverables.
- Acted as a bridge between technical execution and business needs, ensuring that front-end decisions supported commercial goals, delivery efficiency, and stronger brand performance.

Stack: WordPress, PHP, Advanced CSS, JavaScript

Prime Ideas - MyBookie

Technical Lead Front End — Feb 2016 - Oct 2017

- Led front-end development for high-traffic sportsbook and marketing platforms, operating as the primary technical reference for frontend and UI decisions.
- Played a key role in the development of a custom sportsbook platform and real-money payment flows, focusing on performance, reliability, and long-term maintainability.
- Defined and implemented reusable, component-based frontend architectures to reduce maintenance overhead and support platform growth.
- Mentored junior developers through code reviews and technical guidance, helping establish stronger frontend standards and best practices.

Core stack: WordPress, PHP, JavaScript, Advanced CSS

Double Digit

Front End and Email Developer — Sep 2015 - Feb 2016

- Built and maintained HTML email templates, landing pages, and digital assets for enterprise-level brand-driven campaigns, ensuring cross-client compatibility, performance, and visual consistency.
- Developed reusable email and front-end components using HTML, CSS, and JavaScript, improving consistency and scalability across campaign deliverables.
- Worked extensively with Salesforce Marketing Cloud at enterprise scale, including AMScript, Data Extensions, dynamic content, audience segmentation, personalization, and end-to-end campaign deployments.
- Created a Node.js-based email development bundle that introduced a component-driven workflow through a templating engine, accelerating development and helping standardize implementation practices across the team.
- Developed a QA tool that enabled simultaneous previews across multiple devices and resolutions with automatic refresh, significantly speeding up testing and iteration.
- Contributed to a 50% improvement in both development speed and quality by building internal tooling, streamlining workflows, and promoting more structured implementation practices.
- Produced component documentation in PDF format in collaboration with the design team, giving clients a clear visual reference of reusable modules that could later be customized by replacing text and images.
- Led training sessions on email development best practices for other teams outside my direct department, extending technical standards and improving cross-team capability.
- Trained junior developers in Salesforce Marketing Cloud and AMScript, helping them ramp up faster and execute campaigns more effectively.
- Collaborated closely with designers, marketers, and stakeholders throughout the full campaign lifecycle, helping translate business and brand requirements into reliable, production-ready assets.
- Delivered marketing assets for major enterprise clients, including Citi and Wells Fargo.

- Owned the implementation of email campaigns, landing pages, banners, and client-facing websites in a fast-paced agency environment with tight deadlines.
- Ensured cross-browser and cross-email-client compatibility while maintaining performance and design integrity across multiple concurrent projects.
- Built modular, reusable UI patterns to enable faster iteration and consistent delivery across campaigns.
- Collaborated with design and project teams to translate creative concepts into structured, production-ready frontend solutions.

Experian Marketing Services

Aug 2012 - Oct 2015

Front End and Email Developer

- Delivered and maintained large-scale email and web campaigns for enterprise clients, ensuring cross-client compatibility, performance, and visual consistency across high-volume communications.
- Built reusable front-end and email components to support scalable delivery across multiple brands and campaigns.
- Collaborated closely with designers and stakeholders throughout the full lifecycle, translating requirements into reliable and maintainable UI implementations.
- Contributed to internal tooling and template systems to improve development efficiency, consistency, and long-term maintainability.
