YEARS EXPERIENCE	MONTHLY USERS	FASTER DELIVERY	MAJOR PROJECTS

SUMMARY

I build software products that create business value. Over 18+ years I have owned delivery for high-traffic enterprise systems — turning product goals into architecture, standards, and shipped outcomes across gaming, fintech, banking, SaaS, and ecommerce.

My work sits at the intersection of product engineering and technical leadership: clearer ownership, reusable platforms, measurable delivery, and teams that ship with confidence.

HOW I BUILD SOFTWARE TODAY (AI-ASSISTED DELIVERY)

AI is a multiplier. Architecture, engineering decisions, and product thinking remain human-driven. I use Cursor, Claude, and ChatGPT to accelerate debugging, prototyping, and documentation. Architecture choices, code review, and production changes remain strictly under human engineering ownership.

TECHNICAL SKILLS

- Software Engineering:** TypeScript, JavaScript, React, Next.js, Remix, Astro, Node.js, REST APIs, GraphQL
- Product Engineering:** Product delivery, MVP development, Cross-functional collaboration, Requirements to architecture, Reusable platforms
- AI-Assisted Dev:** Cursor, Claude, ChatGPT, AI-assisted debugging, Prototyping, Documentation workflows, AI API integrations, RAG product integrations
- Architecture:** SSR · SSG · ISR, Component libraries, Design systems, Micro frontends, Headless CMS, WordPress · Gutenberg, Strapi, Enterprise web platforms
- Frontend Engineering:** Tailwind CSS, Design systems, Accessibility · WCAG, Core Web Vitals, Code splitting, Bundle optimization
- Developer Workflow:** Git-based workflows, Agile · Scrum, Code review & standards, Technical planning, Developer productivity
- Testing & Quality:** Jest, React Testing Library, Cypress, Unit & integration testing, QA workflows
- Leadership:** Technical leadership, Team leadership, Mentoring, Hiring support, Engineering standards

CAREER HIGHLIGHTS

- Enterprise & Platform Experience:** Delivered for Citi, Wells Fargo, Accenture, Experian, BetUS, MyBookie, BetAnything.
- Delivery & Business Value:** Delivered software products supporting 1M+ monthly users; cut planned delivery timelines by ~50% on major platform rebrands and migrations; improved delivery predictability through reusable platforms; reduced production defects by embedding testing into release workflows; accelerated iteration with AI-assisted workflows while keeping code review and architecture human-owned.
- Leadership & Architecture:** Led and mentored teams of up to 25 designers and engineers; owned platform architecture for multi-brand enterprise products; built reusable design systems and component libraries; modernized legacy platforms into maintainable, testable systems; coordinated engineering, design, marketing, and product stakeholders through complex delivery cycles.

WORK EXPERIENCE

Trigal Media — Senior Web Developer Lead (Freelance / Part-time) <i>Software and product lead for a Costa Rica-based startup shipping AI-enabled MVPs across legal, healthcare, education, and SMB verticals</i> - Own architecture direction, code reviews, and hands-on delivery, helping a junior-heavy team move from idea to production-ready product foundations. - Accelerate MVP delivery across legal, healthcare, education, and SMB product initiatives through architecture guidance and hands-on delivery. - Integrate AI APIs and RAG workflows into production-ready, user-facing applications with maintainable frontend patterns. - Apply AI-assisted development workflows (Cursor, Claude, ChatGPT) to accelerate debugging, prototyping, and documentation without skipping review. - Mentor developers through code reviews, pairing, and practical engineering standards.	Sep 2025 – Present
BetUS / BetAnything — Senior Web Developer Lead <i>Owned frontend architecture and technical leadership across WordPress, sports media sites, affiliate properties, and React/Remix/Strapi apps</i> - Completed a planned 12-month platform rebrand and migration in 6 months (~50% faster delivery). - Delivered 10+ custom WordPress/property themes and resolved complex implementations the team had been unable to ship, across high-volume platforms supporting 1M+ monthly users. - Established Jest, React Testing Library, and Cypress testing standards, improving Core Web Vitals and reducing production defects. - Improved team output and engineering consistency through architecture standards, hands-on training, and developer mentoring.	Aug 2021 – Aug 2025
Accenture (Citi & Wells Fargo) — Web Developer Senior Analyst <i>Enterprise marketing operations and technical execution for major U.S. banking clients, on a 15-person team</i> - Supported enterprise programs for Citi, Wells Fargo, and other U.S. banking clients through compliance-sensitive Salesforce Marketing Cloud operations. - Built a Node.js component-driven email bundle that substantially increased campaign output and reduced repetitive build work. - Standardized workflows, improved cross-client QA checks, and mentored junior developers and cross-department teams. <i>Career pause — personal development and relocation (Jan – Jun 2020)</i>	Jul 2020 – Jul 2021
JazzSports / MyBookie — Technical Lead Manager <i>Technical Lead Manager for 25 designers and developers across sportsbook and casino platforms</i> - Led 25 designers and developers across two teams, with responsibility for hiring, technical direction, code quality, and delivery schedules. - Managed 40+ major projects across casino, sportsbook, email, and commercial brand properties. - Reduced production delivery time by ~50% through clearer sprint planning, code review standards, and Agile workflow improvements. - Contributed to client base growth through more reliable delivery and an SEO-focused publishing strategy.	Sep 2015 – Dec 2019
Experian Marketing Services — Front End & Email Developer <i>Enterprise frontend and campaign developer on a 10-person marketing team</i> - Substantially increased campaign output through reusable templates, components, and standardized development workflows. - Created a training program for new developers on proprietary campaign workflows, reducing onboarding time. - Reduced rework by improving cross-client QA checks and brand-standard review before handoff.	Aug 2012 – Oct 2015

WHAT I'M LOOKING FOR

- Senior Software Engineer, Product Engineer, or Tech Lead role.
- Product and platform teams shipping enterprise software — SaaS, Fintech, or high-traffic digital products.
- Environments that value architecture, delivery ownership, and strong engineering culture.
- Available immediately for U.S. and Canada collaboration (tourist visa / eTA) | UTC-6 (Costa Rica).
