What I'm Looking For

- Remote-only position — not open to relocation
- Senior Frontend Engineer or Frontend Tech Lead role
- React / TypeScript stack — SaaS, Fintech, or Platform teams
- Product company or agency with international remote culture
- Available immediately for U.S. and Canada collaboration (tourist visa / eTA)
- Open to async-first teams across U.S. time zones (UTC-6, Costa Rica)

TECHNICAL SKILLS

Frontend Development React · TypeScript · Next.js · Remix · Astro · JavaScript · Tailwind CSS	CMS & Platforms WordPress · Gutenberg · Headless CMS · Strapi
Frontend Architecture SSR · SSG · ISR · Component libraries · Design systems · Micro frontends · Scalable UI architecture	AI-Assisted Development Cursor · Claude · ChatGPT · AI-assisted debugging · prototyping · documentation workflows
Accessibility WCAG 2.1 · ADA · Section 508 · ARIA · Keyboard navigation · Focus management	Performance Optimization Core Web Vitals · Code splitting · Lazy loading · Performance audits · Bundle optimization
Backend Integration GraphQL · REST APIs · Laravel · Node.js · PHP	Testing Jest · React Testing Library · Cypress · Unit & integration testing
State Management & Data React Query · TanStack Query · Redux · Zustand · Context API · SWR	Leadership & Collaboration Technical leadership · Mentoring · Cross-functional collaboration · Agile · Scrum
Languages English — Professional fluency (C1) · Spanish — Native	

WORK EXPERIENCE

Trigal Media

Sep 2025 – Present

♦ **Currently available for full-time remote opportunities alongside this engagement**

Senior Web Developer Lead (Freelance / Part-time)

Freelance frontend technical lead for a Costa Rica-based startup focused on AI-powered MVPs across legal, healthcare, education, and SMB verticals. Architecture direction, code reviews, and hands-on development with React, Next.js, Astro, and TypeScript — supporting AI API and RAG integrations on a project basis.

- Provide frontend architecture guidance on a freelance basis for AI-assisted MVPs across legal, healthcare, education, and SMB product initiatives
- Support integration of AI APIs and RAG workflows into user-facing applications with maintainable, production-ready frontend patterns
- Apply AI-assisted development workflows (Cursor, Claude, ChatGPT) during focused project engagements to accelerate debugging, prototyping, and documentation
- Mentor junior developers during project engagements through code reviews, pairing, and practical frontend standards
- Collaborate with product and design stakeholders on scoped frontend execution plans when projects are active

Stack: React · Next.js · Astro · TypeScript · WordPress · Laravel · AI APIs · RAG · AI-Assisted Development

Gambling Industry — BetUS / BetAnything (Confidential)

Aug 2021 – Aug 2025

BetUS · BetAnything

Senior Web Developer Lead

Owned frontend architecture and technical leadership across BetUS and BetAnything properties over four years — spanning WordPress platforms, sports media sites, affiliate properties, and BetAnything.eu on React, Remix, and Strapi. Led cross-functional delivery with architecture standards, mentoring, and engineering decision-making across a multi-brand sportsbook environment.

- Completed a planned 12-month platform rebrand and migration in 6 months — delivering in 50% of the planned timeline
- Delivered 10+ custom WordPress themes and resolved complex implementations the team had previously been unable to ship
- Improved team output and engineering consistency through architecture standards, hands-on training, and developer mentoring
- Established Jest, React Testing Library, and Cypress standards — improving Core Web Vitals and reducing production defects

Stack: React · Remix · TypeScript · WordPress · PHP · Laravel · Strapi · Jest · Cypress

Accenture

Jul 2020 – Jul 2021

Citi · Wells Fargo · Salesforce Marketing Cloud

Web Developer Senior Analyst

Supported enterprise marketing operations for major U.S. banking clients including Citi and Wells Fargo on a 15-person team — contributing frontend architecture decisions and compliance-sensitive email delivery through Salesforce Marketing Cloud.

- Supported enterprise email programs for Citi, Wells Fargo, and other U.S. banking clients through compliance-sensitive Salesforce Marketing Cloud operations
- Built a Node.js component-driven email bundle that substantially increased team campaign output and reduced repetitive build work
- Standardized campaign workflows to improve cross-client compatibility and QA turnaround across concurrent programs
- Mentored junior developers and trained cross-department teams on Marketing Cloud workflows

Stack: Salesforce Marketing Cloud · AMPscript · HTML · CSS · JavaScript · Node.js

— Career pause: personal development and relocation, Jan – Jun 2020 —

Technical Lead Manager

Technical Lead Manager for 25 designers and developers across two teams at a high-traffic sportsbook and casino company — responsible for hiring, mentoring, frontend architecture ownership, and delivery across WordPress, PHP, .NET, and multi-brand marketing properties.

- Led 25 designers and developers across two teams, with responsibility for hiring, technical direction, code quality, and delivery schedules
- Managed 40+ major projects across casino, sportsbook, email, and commercial brand properties
- Reduced production delivery time by approximately 50% through clearer sprint planning, code review standards, and Agile workflow improvements
- Contributed to client base growth through an SEO-focused WordPress strategy and more reliable delivery across sportsbook and casino properties

Stack: WordPress · PHP · .NET · JavaScript · SEO · Email & banner production

Experian Marketing Services

Aug 2012 – Oct 2015

Front End and Email Developer

Front-end and email developer on a 10-person enterprise marketing team — contributed to reusable template architecture, onboarding, and QA practices for high-volume HTML campaigns, landing pages, and forms on Experian's proprietary platform.

- Substantially increased campaign output through reusable templates, components, and standardized development workflows
- Created a training program for new developers on proprietary campaign workflows, reducing onboarding time
- Reduced rework by improving cross-client QA checks and brand-standard review before handoff
- Supported high-volume email and web campaigns for beauty, retail, and enterprise clients

Stack: HTML · CSS · JavaScript · Email Development · A/B Testing · Cross-client QA

CAREER HIGHLIGHTS

Executive summary of transferable strengths in frontend architecture, technical leadership, and modern delivery — with verifiable project details in Work Experience above.

Delivery & Business Value

- Translate complex product requirements into maintainable frontend architecture across React, WordPress, and headless CMS ecosystems
- Improve delivery predictability through reusable patterns, engineering standards, and practical workflow improvements
- Bridge business priorities and technical execution in high-traffic, multi-stakeholder environments
- Integrate performance, accessibility, and quality practices into production workflows without slowing delivery
- Apply AI-assisted development thoughtfully to support faster iteration while preserving code review rigor

Leadership & Architecture

- Lead and mentor engineers through architecture decisions, code reviews, and hands-on technical guidance
- Own frontend architecture for component libraries, design systems, and headless CMS integrations
- Coordinate cross-functional delivery across engineering, design, marketing, and product teams
- Modernize legacy platforms into React-centric architectures with clearer ownership and maintainability
- Establish engineering standards that improve team consistency, onboarding, and long-term platform health

PORTFOLIO

Additional work available on request — including SaaS, healthcare, and education projects (current client work under NDA).

BetAnySports — betanything.eu

React · Remix · Strapi

High-traffic sportsbook platform. Rebranded and migrated in 6 months (50% faster than planned). 1M+ monthly users.

Insiders — insidersbettingdigest.com

WordPress

SEO-driven sports media site with high-volume content publishing at scale.

Crypto Tutorials — crypto-tutorials.com

React

Content marketing site with API-driven dynamic data delivery.

My Bookie — mybookie.ag

WordPress · PHP · JavaScript

Enterprise sportsbook frontend across multi-brand properties. 10+ custom WordPress themes delivered.
