About

Senior Front-End Developer & UI/UX Engineer with 10+ years of experience building scalable, high-performance web applications.

SPECIALIZED IN:

- React & modern JavaScript front-end architectures (SPAs, dashboards, enterprise apps)
- Custom WordPress - Themes & Plugins & Headless CMS (Strapi)
- Laravel-based integrations
- UI/UX design and design systems

FOCUS AREAS:

- Applied AI tools for personalized content delivery and predictive analytics.
- Performance optimization and Core Web Vitals
- State management & server state (Redux, Zustand, React Query)
- Resilient API integration (retries, error boundaries, fallback UI)
- Clean, scalable UI architectures
- Accessibility (WCAG 2.1, keyboard, focus management, ARIA) and long-term maintainability

INDUSTRIES:

- Sports betting & gaming platforms
- SaaS products and marketing platforms
- Healthcare and banking applications
- Marketing platforms, A/B testing, and personalized email campaigns driven by AI to optimize user engagement across web and email.

AI-ASSISTED DEVELOPMENT:

AI-assisted development: I leveraged AI tools such as Cursor, Claude, and ChatGPT to accelerate debugging, refactoring, and delivery. However, I emphasized a disciplined approach by training junior developers in step-by-step prompt design, ensuring they understood best practices and avoided monolithic prompts. I also insisted that AI-assisted work always be paired with rigorous human code reviews, guaranteeing that every outcome was validated and held to high-quality standards before delivery.

This approach not only improved delivery speed but also fostered a culture of accountability, ensuring that AI was a tool that enhanced, not replaced, critical human judgment.

TRAVEL AVAILABILITY:

- U.S. (tourist visa) · Canada (eTA)

Technical Skills

Frontend Development

- React, Next.js (SSR, SSG, ISR, App Router), Remix
- State management (Redux, Zustand, React Context)
- Modern JavaScript (ES6+, Async/Await, Closures, Event Loop)
- Advanced CSS (Flexbox, Grid, Animations, Custom Properties, Semantic HTML, BEM, design tokens)
- Performance (Code Splitting, Lazy Loading, Core Web Vitals, virtualization for large lists, memory leak prevention)
- Accessibility (WCAG 2.1, ADA, Section 508, keyboard navigation, focus management, ARIA)
- SEO & Web Best Practices

UI/UX Design

- Design systems & component libraries
- End-to-end application design & UX architecture
- User research (interviews, usability testing, heuristic evaluation)
- Design-to-code translation
- Tools: Figma, Adobe XD, Balsamiq, Sketch

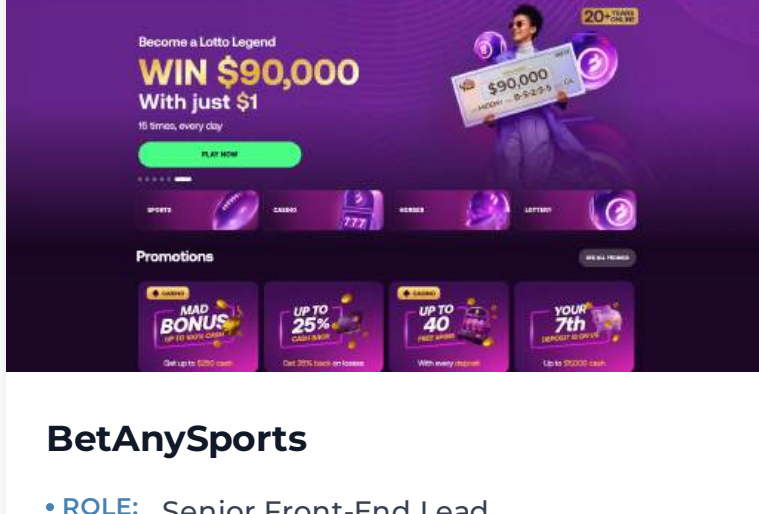

Development Tools

- Testing (Jest, React Testing Library, Cypress, unit & integration tests)
- Data fetching (React Query, TanStack Query, SWR, resilient patterns)
- Git & GitHub (branching, workflows, CI/CD)
- Modern build tools (Vite, Webpack)
- Node.js-based tooling
- WordPress (custom themes & plugins)
- Laravel framework
- Headless CMS (Strapi)
- REST APIs & GraphQL (retries, error boundaries)
- Storybook (component docs, visual regression)
- SQL databases (MySQL)

Professional Skills

- Agile / Scrum environments
- Cross-team & async communication
- Troubleshooting & root-cause analysis
- Security & scalability awareness
- AI tools for productivity and development

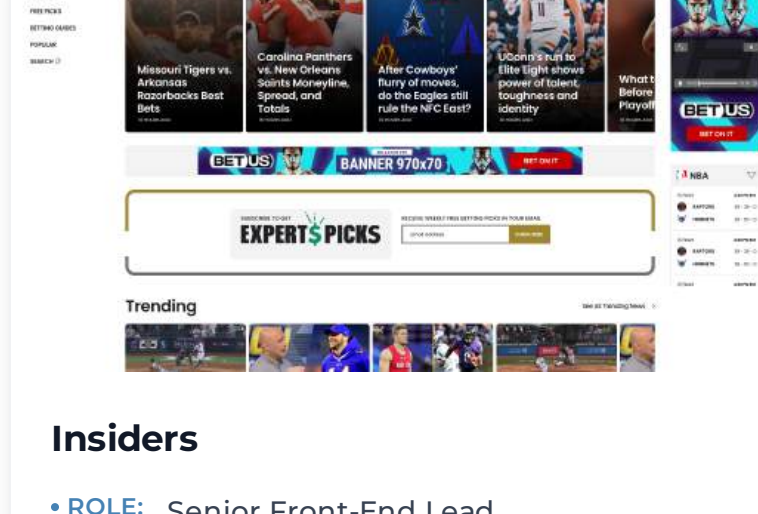

Portfolio

BetAnySports

- ROLE: Senior Front-End Lead
- TECH: Strapi · React · Remix
- FOCUS: Headless CMS, data fetching, scalable SPA architecture, Core Web Vitals

Work Experience

Trigal Media

Senior Web Developer Lead

Set - 2025 - Current

- Led a cross-functional team of 10 developers and 3 designers in a specialized AI-focused company.
- Developed AI-powered applications for lawyers, healthcare professionals, and education sectors.
- Built e-commerce websites for micro and medium-sized businesses, enabling them to sell products via optimized shopping carts, payment methods, and automation tools.
- Specialized in AI-assisted development, using voice commands for prompts to guide developers, encouraging verbal input over typing and ensuring sequential prompts for precise outcomes.
- Delivered AI-driven tools with Laravel, WordPress, and Next.js, enabling rapid, scalable solutions.
- Spearheaded A/B testing strategies for e-commerce sites, leveraging AI to create and iterate page variants, resulting in faster go-to-market.
- Successfully reduced project timelines, completing applications that were originally estimated to take a year in just six months.
- Mentored developers in Laravel, ensuring best practices and efficient code delivery.
- Enabled small and medium enterprises to elevate their online presence, helping them position products effectively and grow their digital commerce.

Core stack: React, Astro, WordPress, TypeScript, Tailwind

Brand Builders Sportsbook

Senior Web Developer Lead

May 2024 - Aug 2025

- Led and managed a cross-functional team of 7 professionals, including front-end developers, designers, and marketing/content specialists within the online gambling industry
- Incorporated AI-driven personalization to optimize user engagement across platforms.
- Hired specifically to elevate the company's front-end and design practices, transitioning teams away from legacy workflows toward scalable, maintainable front-end architectures
- Played a key role in the development and evolution of the company's main brand platform (BetAnything.eu), supporting brand growth, performance, and content scalability
- Built and maintained high-traffic, marketing-driven platforms including affiliate websites, brand pages, and campaign landing pages
- Defined and implemented component-based front-end architectures to reduce maintenance effort and improve long-term productivity
- Oversee delivery and maintenance of commercial websites, marketing platforms, and brand assets at scale
- Coordinated Agile/Scrum workflows across concurrent initiatives to improve delivery cadence and cross-team collaboration
- Provided hands-on technical leadership and mentorship, supporting developers through architectural decisions and modernization efforts
- Worked closely with stakeholders to align technical execution with marketing, product, and business goals
- Established testing practices (Jest, React Testing Library, Cypress) for component and E2E coverage, improving delivery confidence and reducing production bugs

Stack: React, Astro, WordPress, TypeScript, Tailwind

Prevent Security - BetUs Sportsbook

Senior Front End Developer - WordPress

Mar 2023 - May 2024

- Served as Senior Front-End Developer and technical lead, guiding a cross-functional team of B+ developers and designers across high-traffic digital platforms.
- Led the development of custom WordPress themes from scratch for multiple high-profile sports media and editorial brands, supporting scalable content operations and long-term platform growth.
- Defined front-end architecture and component-based systems to improve scalability, maintainability, and speed of content production across concurrent initiatives.
- Delivered 10+ high-impact WordPress projects, coordinating timelines, priorities, and quality standards across multiple parallel workstreams.
- Trained and upskilled team members in building custom WordPress themes from scratch, strengthening the team's technical capabilities and delivery capacity.
- Aligned development execution with design goals by teaching UX/UI best practices, improving collaboration between design and engineering and increasing implementation feasibility.
- Acted as a bridge between design, content, and engineering teams, helping translate business and editorial requirements into production-ready solutions.
- Mentored junior and mid-level developers through code reviews, technical guidance, and best-practice adoption, raising overall team maturity and implementation quality.
- Contributed to projects using Laravel for backend-driven functionality and React.js for interactive UI components, supporting more flexible and modern user experiences.
- Promoted agile workflows, continuous improvement, and shared ownership, resulting in stronger team alignment, better execution, and more reliable delivery.
- Helped generate continued business growth by delivering strong results, which led to a higher volume of projects and increasingly complex initiatives being assigned to the team.
- Successfully delivered modules that had previously been considered too complex to build, demonstrating strong technical leadership and the team's ability to execute challenging solutions under my guidance.

Core stack: WordPress, PHP, Laravel, JavaScript, React, Advanced CSS

Assemble Studio

Front End Developer - Freelance

Aug 2021 - Aug 2022

- Worked as a hands-on front-end and email developer delivering HTML email campaigns, banners, landing pages, and websites for pharmaceutical clients, adhering to strict brand, UX, and compliance requirements
- Collaborated closely with design teams to refine UX/UI practices and ensure consistency across regulated, content-heavy communications
- Contributed across the full project lifecycle, from requirements analysis and UX/UI design through final implementation
- Produced wireframes, prototypes, and design deliverables using tools such as Figma, Adobe XD, Sketch, and Balsamiq
- Developed reusable front-end components and templates to support scalable and maintainable delivery
- Created internal tooling using Node.js to improve development workflows, modularity, and team productivity
- Worked with dynamic content management solutions to support personalized, data-driven campaign execution at scale

Accenture

Web Developer Senior Analyst

Jul 2020 - Jul 2021

- Worked as a hands-on front-end and email developer within an enterprise marketing department, delivering high-volume digital communications during a fast-paced and highly demanding period.
- Built and maintained HTML email templates, landing pages, websites, and digital marketing assets for enterprise-level, brand-driven campaigns, ensuring cross-client compatibility, performance, and visual consistency.
- Developed reusable email and front-end components using HTML, CSS, and JavaScript, improving consistency and scalability across campaign deliverables.
- Worked extensively with Salesforce Marketing Cloud at enterprise scale, including AMPscript, Data Extensions, dynamic content, audience segmentation, personalization, and end-to-end campaign deployments.
- Created a Node.js-based email development bundle that introduced a component-driven workflow through a templating engine, accelerating development and helping standardize implementation practices across the team.
- Developed a QA tool that enabled simultaneous previews across multiple devices and resolutions with automatic refresh, significantly speeding up testing and iteration.
- Contributed to a 50% improvement in both development speed and quality by building internal tooling, streamlining workflows, and promoting more structured implementation practices.
- Produced component documentation in PDF format in collaboration with the design team, giving clients a clear visual reference of reusable modules that could later be customized by replacing text and images.
- Led training sessions on email development best practices for other teams outside my direct department, extending technical standards and improving cross-team capability.
- Trained junior developers in Salesforce Marketing Cloud and AMPscript, helping them ramp up faster and execute campaigns more effectively.
- Collaborated closely with designers, marketers, and stakeholders throughout the full campaign lifecycle, helping translate business and brand requirements into reliable, production-ready assets.
- Delivered marketing assets for major enterprise clients, including Citi and Wells Fargo.

Business Solutions - JazzSports Sportsbook

Technical Lead Manager

Nov 2017 - Dec 2019

- Led and mentored two cross-functional teams of front-end developers, designers, and marketing/content specialists across casino and sportsbook initiatives, serving as the primary technical leader for multiple high-traffic digital platforms.
- Reduced production delivery time by 50% by introducing stronger development oversight, improving estimation accuracy, and establishing tighter execution standards across the teams.
- Served as the main point of reference for front-end and UI decisions, guiding architecture, implementation quality, and technical consistency across commercial websites, email platforms, animated banners, and marketing assets.
- Drove the modernization of front-end and design practices, helping teams move away from outdated workflows and legacy approaches toward more scalable, maintainable solutions.
- Defined technical direction and reviewed implementations to support scalable, component-based front-end architectures that improved long-term maintainability and team efficiency.
- Proposed and implemented the use of WordPress for SEO-driven commercial sites, aligning the technology stack with brand growth objectives and enabling stronger organic positioning through tools such as Yoast.
- Standardized processes, workflows, and best practices across teams, increasing consistency, improving quality, and creating a more reliable delivery model.
- Coordinated Agile/Scrum workflows across multiple disciplines and concurrent initiatives, improving collaboration, planning, and execution across teams.
- Mentored junior developers and helped grow them into mid-level contributors through hands-on coaching, code reviews, and technical guidance.
- Trained the UX/UI design team on modern digital best practices, including UX principles and HTML fundamentals, which improved cross-functional collaboration and raised the quality of final deliverables.
- Acted as a bridge between technical execution and business needs, ensuring that front-end decisions supported commercial goals, delivery efficiency, and stronger brand performance.

Stack: WordPress, PHP, Advanced CSS, JavaScript

Prime Ideas - MyBookie

Technical Lead Front End

Feb 2016 - Oct 2017

- Led front-end development for high-traffic sportsbook and marketing platforms, operating as the primary technical reference for frontend and UI decisions.
- Played a key role in the development of a custom sportsbook platform and real-money payment flows, focusing on performance, reliability, and long-term maintainability.
- Defined and implemented reusable, component-based frontend architectures to reduce maintenance overhead and support platform growth.
- Mentored junior developers through code reviews and technical guidance, helping establish stronger frontend standards and best practices.

Core stack: WordPress, PHP, JavaScript, Advanced CSS

Double Digit

Front End and Email Developer

Sep 2015 - Feb 2016

- Owned the implementation of email campaigns, landing pages, banners, and client-facing websites in a fast-paced agency environment with tight deadlines.
- Ensured cross-browser and cross-email-client compatibility while maintaining performance and design integrity across multiple concurrent projects.
- Built modular, reusable UI patterns to enable faster iteration and consistent delivery across campaigns.
- Collaborated with design and project teams to translate creative concepts into structured, production-ready frontend solutions.

Experian Marketing Services

Aug 2012 - Oct 2015

Front End and Email Developer

- Delivered and maintained large-scale email and web campaigns for enterprise clients, ensuring cross-client compatibility, performance, and visual consistency across high-volume communications.
- Built reusable front-end and email components to support scalable delivery across multiple brands and campaigns.
- Collaborated closely with designers and stakeholders throughout the full lifecycle, translating requirements into reliable and maintainable UI implementations.
- Contributed to internal tooling and template systems to improve development efficiency, consistency, and long-term maintainability.
