PROFILE

I am a Senior Software Engineer with deep frontend architecture experience and real full-stack product delivery ownership. My strongest depth is React/TypeScript, scalable UI systems, performance, accessibility, and design systems, but my work also connects APIs, headless CMS platforms, Node.js services, PHP/Laravel backends, testing, CI/CD, release workflows, and AI-assisted delivery.

WORK EXPERIENCE

Trigal Media

Sep 2025 - Present

Senior Software Engineer (Freelance / Part-time)

Senior Software Engineer for a Costa Rica-based startup shipping AI-enabled MVPs across legal, healthcare, education, and SMB verticals. Own frontend architecture, code reviews, and hands-on product delivery across React/TypeScript applications, API integrations, WordPress and Laravel backends, and AI-assisted workflows.

- Accelerated MVP delivery across legal, healthcare, education, and SMB product initiatives through architecture guidance and hands-on delivery.
- Integrated AI APIs and RAG workflows into production products with maintainable software patterns.
- Mentored junior developers through code reviews, pairing, reusable rules, and practical engineering standards.

Gambling Industry - BetUS / BetAnything

Aug 2021 - Aug 2025

Senior Software Engineer

Owned frontend architecture and full-stack product delivery across BetUS and BetAnything properties for four years - sports media, affiliate properties, and a high-traffic sportsbook product.

- Completed a planned 12-month platform rebrand and migration in 6 months - 50% of the planned timeline.
- Delivered 10+ custom property themes and unblocked complex implementations the team had been unable to ship.
- Improved team output through architecture standards, mentoring, testing practices, and platform ownership.

WORK EXPERIENCE CONTINUED

Accenture

Jul 2020 - Jul 2021

Web Developer Senior Analyst

Supported enterprise marketing operations for major U.S. banking clients including Citi and Wells Fargo on a 15-person team, improving campaign delivery systems, component-driven email platforms, and compliance-sensitive operations at scale.

- **Supported high-volume enterprise email programs under strict compliance requirements.**
- **Built a component-driven email delivery system that increased campaign output and reduced repetitive build work.**
- Standardized campaign workflows to improve cross-client compatibility and QA turnaround.

Gambling Industry - JazzSports / MyBookie

Sep 2015 - Dec 2019

Senior Software Engineer

Owned delivery for 25 designers and developers across two teams at a high-traffic sportsbook and casino company - hiring, mentoring, frontend architecture, and shipping multi-brand marketing and product properties.

- **Led 25 designers and developers across two teams - hiring, technical direction, code quality, and delivery schedules.**
- Managed 40+ major projects across casino, sportsbook, email, and commercial brand properties.
- Reduced production delivery time by approximately 50% through clearer planning, review standards, and Agile workflow improvements.

STACK

WordPress PHP .NET JavaScript SEO Email & banner production

Experian Marketing Services

Aug 2012 - Oct 2015

Senior Front End

Software engineer on a 10-person enterprise marketing team, improving reusable template systems, onboarding, and QA practices for high-volume campaigns, landing pages, and forms.

- Substantially increased campaign output through reusable templates, components, and standardized workflows.
- Created a training program that reduced onboarding time for incoming developers.
- Reduced rework by improving cross-client QA checks and brand-standard review before handoff.

CAREER HIGHLIGHTS

- Delivered high-traffic web platforms supporting 1M+ monthly users.
- Cut planned delivery timelines by ~50%, including a 12-month rebrand shipped in 6 months.
- Owned frontend architecture for multi-brand platforms including API, CMS, and backend integrations.
- Built reusable design systems and component libraries that sped team delivery.

SELECTED WORK

- BetAnySports - React, Remix, Strapi - sportsbook platform rebrand for 1M+ MAU.
- Master Affiliates - React - affiliate acquisition funnel for sportsbook and casino program.
- Insiders - WordPress - sports media publishing platform for high-volume content.
- Crypto Tutorials - React - content product with API-driven updates.
- MyBookie - WordPress, PHP, JavaScript - multi-brand sportsbook and casino systems.

WHAT I AM LOOKING FOR

Senior Software Engineer roles with strong frontend architecture ownership, product/platform teams shipping web products, and environments that value architecture, full-stack product delivery, testing, CI/CD, and engineering culture. Based in Costa Rica (UTC-6), aligned with U.S. time zones, English C1, Spanish native, available for U.S. and Canada collaboration.
